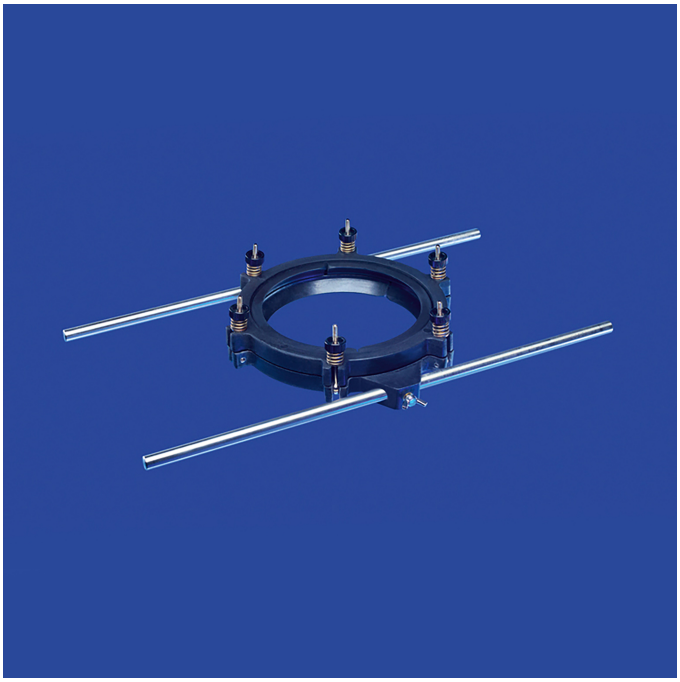
Reaction Vessels and Accessories



Support Systems

Supports for distillation, extraction
and reaction systems

The Lenz® support program consists of standardized components
as round bars and rectangle diagonals which can be combined highly variable with ball and disc knots to a very
solid framework.
Additionally floor plates, supports for KF flanges and others
are available as well as shelvings and specific parts for special
requirements.

Product features of framework components
• High-quality surfaces
(Knots chrome plated, bars powder coated, black RAL 9005)
• Robust joints by thread connections (M 12)
• Easy mounting and dismantling

Bars	Rectangle diagonals	Ball knots	Disc knots

Sheet shelves Floor plate, adjustable Guide wheels

Floor plate	Connectors
