Extractors acc. to Thielepape

Extractors acc. to Thielepape

For the extraction of solids; the vapours pass directly into the condenser; the condensate flows continuously through the extraction sample back into the flask.

The complete apparatuses are consisting of:
Extractor head
with extraction thimbles (porosity: 0),
made of DURAN® tubing,
Dimroth condenser
(details on page 71),
with thread GL 14,
made of DURAN® tubing,
Round bottom flask
material: DURAN®

Extractor (ml)	Condenser (NS)	Flask	Pack (qty.)	Cat. No.
30	29/32	100	1	5 3700 25
150	45/40	250	1	5 3700 43
250	45/40	500	1	5 3700 49
